

Cambodia

Information on Viet Minh and Communist China activity in the development of telecommunications facilities in Cambodia. (S)

Communist China

1. Retain Item 42, page 7 (S) : Information concerning current construction of wirelines or radio installations, especially in the coastal area opposite Formosa.
2. Installation of telephone lines in Sinkiang and Tsinghai Provinces. Kilometers of pole line. Kilometers of wire. Routes of telephone lines. Planned completion date of project. Total cost of project. (CUB)
3. Import of radio-relay equipment from East Germany. Type and amount of equipment. Cost of installation of equipment. Where installed. By whom. Planned completion date of installation. (S)
4. Construction of six-story Central Telegraph Building in Peiping. Type of equipment installed in building. Cost of building and equipment. How financed. Any Soviet Bloc aid and/or technicians involved. (CUB)
5. Telecommunications developments at Mangyai, Tsinghai Province. Type and amount of equipment sent there. Fixed point-to-point radio and wireline connection with other cities. Efficiency of operation. (S)
6. Utilization of telephone and telegraph wire facilities in new railroad construction. Maintenance and operation of wire facilities after completion of railroad construction. Ownership of wire facilities. Total kilometers of pole line and number of wires on pole lines along the various railroads. (C)
7. Extent of use of facsimile telegraphic equipment. Plans for the use of the facsimile telegraphic equipment built and assembled in Chungking in April 1956. (C)

Tibet

1. Retain Item 15, page 36, (C): Information on plans for improvement and expansion of telecommunications and postal service in Tibet.
2. Telephone and/or telegraph wirelines between Lhasa and Yatung. Plans for extension of wirelines to India. (S)

Tibet cont'd

3. Information on telephone and/or telegraph wireline between Lhasa and Chungking. (S)

Indonesia

Retain Item 15, Part 2, page 13, (S): Information on international telecommunications and postal facilities between Indonesia and the Sino-Soviet Bloc; and improvements of the facilities and by whom.

25X6A

Laos

Information on Viet Minh and Communist China activity in the development of telecommunications in Laos. (S)

Thailand

1. Planned installation of a VHF or microwave internal telecommunications system. Engineering firms taking part in survey. Plans for installation and location of equipment. Plans for financing the installation and operation of the system. (CUC)

2. Information on proposed installation of VHF or microwave communications system connecting Thailand, Cambodia, Laos, and South Vietnam. Plans for installation and location of equipment. Plans for financing the installation and operation of the system. (CUC)

North Vietnam

1. Plans for development of wired broadcasting system. Number and location of wired loudspeakers in use. Cost of installation. License fees. Extent of USSR and Communist China assistance. (CUC)

2. Plans for development of radiobroadcasting system. Number of radio broadcasting stations in operation. Number of radio transmitters. Number of radio receivers. License fees. Extent of USSR and Communist China assistance. (C)

3. Extent of Communist China and USSR assistance in the installation of wire facilities connecting North Vietnam with Communist China. Location of any construction activity. Planned completion dates. Type and capacity of equipment. (S)
